Mobile Yard Ramp (Middle Axel)

If you don't have any storage problem for ramps. Our middle axle ramps is best for you. You can convert vacant space into handling-freight center a few minutes.

Made in Turkey

Foldable long back tail providers small parking area requirements. Special designed short end plate supply front wheels of forklift to reach high traction grating on the ramps while rear wheels are still on the ground.

Hidden tow hitch provides safety moving and manoeuvring without any accident and crash.

Middle Axel Mobile Yard Ramps

System is provide handle freight with forklift each conditions. Special design supply low slope so each type forklift can be used.

Convience and Features

System is designed with extended lenght to supply low slope conditions.

System is fully assembled ready to use solutions.

Side plates is smooth to block any crash and accident.

Reinforced and robus I-Beams U- beams hauling parts

Special designed deep overlap of frame.

Electric drive for vertical adjustment rised also Manuel hand pump is available

The tow hitch is insert to foldable short tails(new designed) provides extra safety while ramps is moved. This design is blocked any damages of traditional tow hitch.

All Hydraulic materials is tested according to DIN 2391/C

Operation instruction is available in English and Russian.
